Faculty may pull current and historical class rosters in faculty self-service for their own classes.

Select a term and click on the row to open a class roster.

Tip: Click on the class row, if you click on the title or CRN specifically, it will give you a description of the course/section only and not open the class list.
Faculty can view the class list, wait list, grades, or email the class or individual students. The roster will display Chosen First Name and Last Name sorted in Last Name A-to-Z order by default.

Note: If you use the Student Name (^) column to sort, it will sort by Chosen First Name. To restore the roster to be sorted by Last Name, click ‘Summary Class List’.
