

Healthcare Studies on Blackboard

Through your Blackboard you have access to a wealth of information for the Healthcare Studies program including nursing application preparation information. It was designed to be a convenient tool for you with important information and most frequently used webpage links.

- Log into [MySCSU](http://login.southernct.edu) (login.southernct.edu)
- Click on [Blackboard](#)
- Click on the [Organizations](#) tab
- Open the [Healthcare Studies Advisement](#) tab

There are different sections listed on the left panel once in the organization:

Healthcare Studies

Here you can access the healthcare studies web page, concentration information, academic maps, the healthcare studies advisement worksheet, and guideline of some CT Community College courses that may be taken over summer/winter and transferred back to SCSU.

Nursing App Prep

There are two videos which give an overview to the nursing application preparation process, application eligibility requirements, and resources.

The “Resources” folder has links to-

- BS Nursing webpage (college admission application requirements, prerequisite courses, nursing curriculum)
- Application support web page (GPA calculators, TEAS exam, process for taking community college courses)
- Advisement worksheet specific to nursing
- Handbook: College Admission Pathway to Nursing
- Alternate Pathways to Nursing

Resources for All

Here you will find instructions on how to access-

- Degree evaluation and What-If degree evaluation for different majors
- W courses and search for W and LEP requirements
- How to Download Microsoft Teams for virtual appointments
- Inside Southern’s webpage

Reviewing these before you come to the appointment will help make the advisement meetings more constructive and worthwhile. And we will be able to better help answer any questions that you might have.
