

GlobalProtect VPN: Installation – Chromebook

ntroduction	1
nstallation	1
Set Up	3
Future Connecting and Disconnecting	6

Introduction

This guide will show how to install and set up the GlobalProtect VPN app on a Chromebook. The VPN is used to connect to SCSU's network while located in an off-campus location, such as during remote work.

Installation

1. Open the start menu and select the "Web Store" to open.

2. Using the search bar provided, search for "GlobalProtect".

chrome web store		٥	
globalprotect I × « Home O Extensions O Themes O Apps	۲	Save anything on the web to OneNote	•

3. Scroll to find the "Apps" section and select Palo Alto's "GlobalProtect".

4. Select "Add to Chrome".

chrome web store	٥
Home > Apps > GlobalProtect	
GlobalProtect ★★★★★ 56 ③ Productivity 90,000+ users	Add to Chrome
Overview Reviews Support Related	

5. Select "Add app" after reviewing items the application will need permission to access.

It can:	
Exchange data with any device on the local network	k or internet
Display notifications	
Write to files and folders that you open in the applic	ation
Access list of network connections	
Access your network traffic	
Use your client certificates	

6. Select "Launch app" when finished installing.

Set Up

1. In the "Portal" space provided, enter: **remote.southernct.edu** then select "Add connection".

2. Follow the instructions at the bottom of the window by first opening your "Settings" app.
