

## GlobalProtect VPN: Uninstall - Mac

Introduction	1
How to uninstall GlobalProtect	1

## Introduction

This guide will show how to uninstall the GlobalProtect VPN application on a Mac computer.

## How to uninstall GlobalProtect

- 1. Open an internet browser and go to the website <u>https://remote.southernct.edu</u>.
- 2. If prompted, sign in using your full SCSU email address and password.
- 3. Select the Mac download.

4. Open the file when finished downloading. Where this downloaded file appears may vary depending on the internet browser you are using, however can always be found in your "Downloads" folder.

5. Select "Continue" on the first two dialogue boxes.

6. Uncheck the box titled "GlobalProtect" and check the box titled "Uninstall GlobalProtect". Then, select "Continue".
