

Guest Wi-Fi Access – Self Registration - Android

Introduction	1
Creating a Guest Account	1

Introduction

All students and employees of SCSU can create temporary SCSU-sponsored guest wireless accounts, active for up to 6 months. These guest accounts are for visitors such as family, friends, colleagues, etc. who would like to have access to the campus’ wireless network. If a guest account is needed for more than 180 days, contact the Help Desk to have a request submitted.

If you do not have an SCSU-sponsored guest wireless account, you may choose the Self-Registration option. These instructions will show you how to complete the self-registration process to create a temporary Guest Wi-Fi account that will be active until midnight of the day the account was created.

Please note that prior to connecting to the Guest wireless network, do not move from your location on campus until your device is fully connected and has confirmed internet access.

Creating a Guest Account

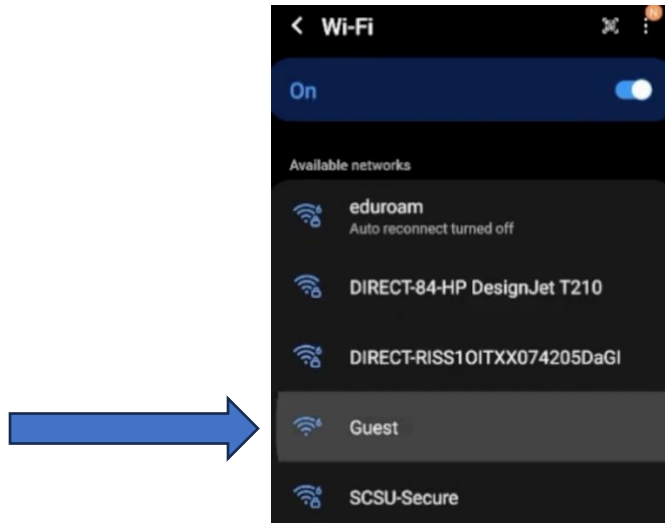

1. To begin, go to your device’s “Settings”.

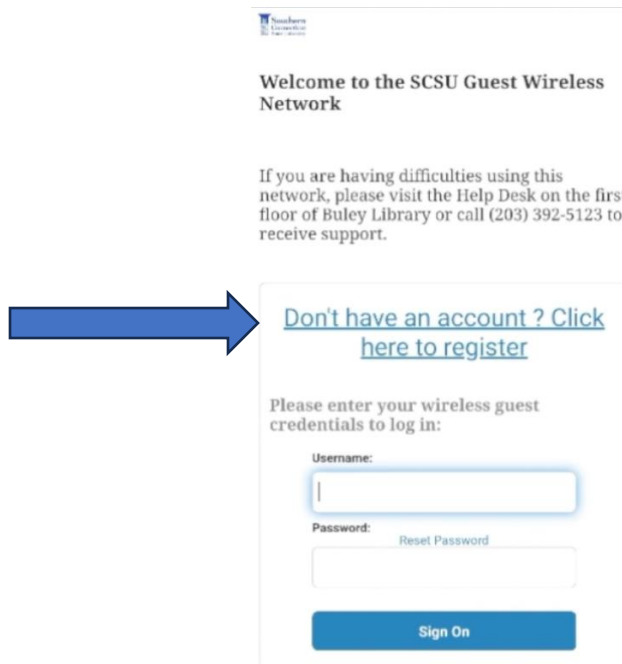

2. Navigate to “Connections” and select “Wi-Fi.”

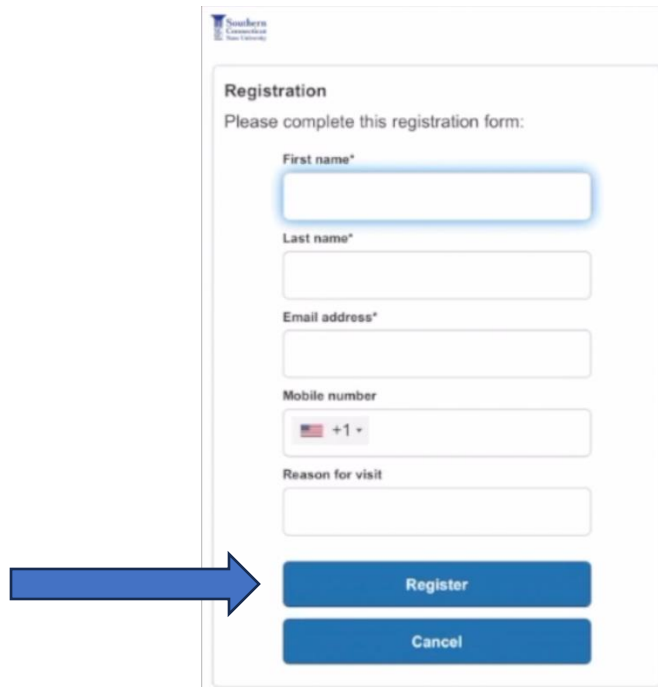

3. Select the network titled, "Guest."

4. You will be prompted to get to the [SCSU Guest Wireless Network](#) landing page. If you are a guest and have not been provided with an [SCSU-Sponsored Guest Wi-Fi Account](#), click the hyperlink to [Self-Register](#).

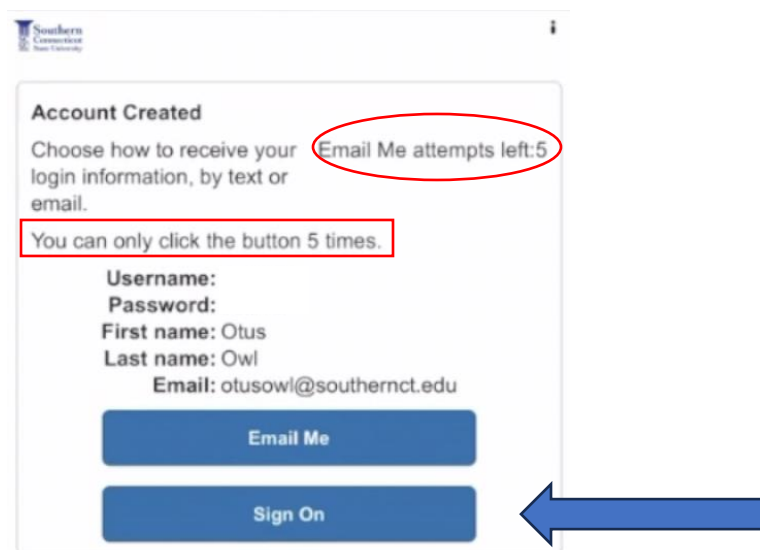

5. Enter your information in the required fields. Once completed click “Register.”

The registration form is titled "Registration" and includes the instruction "Please complete this registration form:". It contains several input fields: "First name*", "Last name*", "Email address*", "Mobile number" (with a dropdown for country code, currently showing "+1"), and "Reason for visit". At the bottom of the form are two buttons: "Register" and "Cancel". A blue arrow points from the left towards the "Register" button.

6. Once registered you will receive your created Guest Wi-Fi Account credentials. Note the max amount of attempts you are permitted to email yourself these credentials.

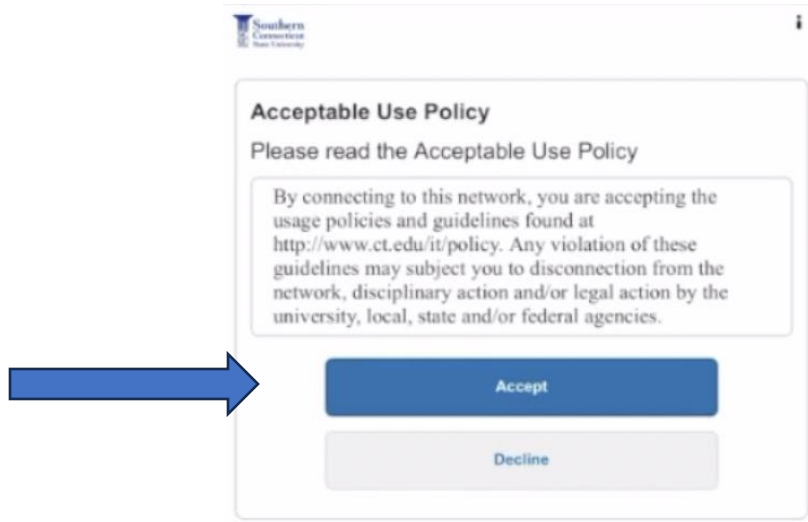

The "Account Created" screen displays the following information: "Choose how to receive your login information, by text or email." followed by "Email Me attempts left:5" (circled in red). Below this is a red-bordered box containing the text "You can only click the button 5 times.". The account details listed are: "Username:", "Password:", "First name: Otus", "Last name: Owl", and "Email: otusowl@southernct.edu". At the bottom are two buttons: "Email Me" and "Sign On". A blue arrow points from the right towards the "Sign On" button.

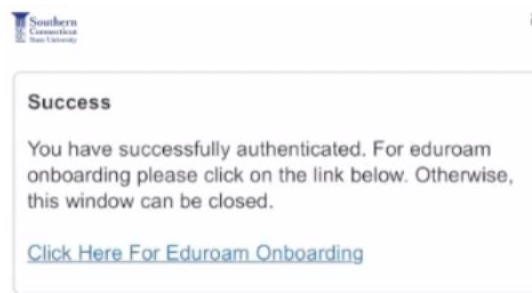

*** It is important to note that these credentials are only active until midnight the day the account was created.***

7. Once your account is created, click “Sign On” to connect to the “Guest” wireless network.

8. After reading the [Acceptable Use Policy](#) click “Accept.”

9. Once you have completed these steps, status should reflect “Success.” Remember to give your device some time to establish a full connection to the network before moving to a new area on campus.

10. Once complete, the status of your “Guest” network connection should reflect “Connected.”
