

Microsoft Intune: Logging In

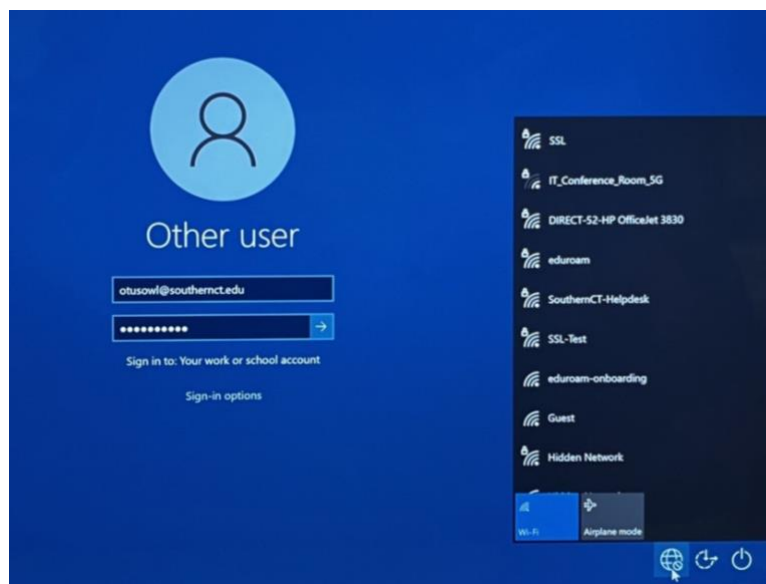

Introduction	1
Logging into an Intune Windows computer	1

Introduction

SCSU's IT department has moved to managing Windows computers via Microsoft Intune. With this, comes a slight change to how computers should be logged into.

Logging into an Intune Windows computer

1. **If this is your first time logging into the computer, it must have an internet connection prior to attempting to log in.** This can be done by connecting to an ethernet cable, or by selecting the WiFi symbol on the bottom, right-hand corner of the sign-in screen and selecting a wireless network. The computer will not be able to communicate with Microsoft and validate your credentials if this is not done.

2. To log in, enter your **full SCSU email address**, followed by your password in the appropriate fields.
