

Mac: Keychain - Changing Password on Mac

Introduction	1
Changing password	1

Introduction

One way to avoid Keychain issues on a Mac is to reset your SCSU NetID password directly through your university-issued Mac's settings. The following steps will walk you through how to change your password this way.

Changing password

- 1. Begin by insuring you are connected to Southern's network via the "SSL" wireless network, and ethernet cable, or the GlobalProtect VPN working remotely, off-campus.
- 2. Select the Apple symbol from the top toolbar, then open "System Preferences".

3. Select "Users & Groups".

4. Select "Change Password".

Login Ontions	Allow user to administer this computer

- 5. Enter your old (current) password, new password, and add a hint for your password if you wish. Once finished, click "Change Password" to register the change. Password requirements:
 - - At least 8 characters total At least 1 lower-case letter •
 - At least 1 upper-case letter
 - At least 1 symbol
 - Is not one of your last 6 passwords
 - Does not contain any personal information (i.e., name, birthdate)
