

Wifi: Eduroam - Chromebook

Introduction	1
How to connect	1
Check your Wi-Fi Status	7

Introduction

This guide will show how to connect Windows devices to the Wi-Fi network: Eduroam.

How to connect

- 1. Open a browser and enter the URL: eduroam.southernct.edu
 - a. You will be directed to the SCSU Eduroam landing page where your device's system will be detected.

- b. If your device is detected incorrectly, select the correct type below.
- c. When confirmed, click "Install".
- 2. A new tab with a prompt to add the "securew2" extension to Chrome will appear. Click "Add to Chrome".

a. Click "Add extension". Once done, a notification will be shown on the top right of your browser and the new extension will be pinned.

3. Once the extension is installed, navigate back to the landing page tab. The prompt should read "Chrome extension installed successfully". Click "Sign In" to authenticate your credentials.

a. Enter your full SCSU email address and password.

4. After authenticating your credentials, the system will prompt the Download and Import of the ONC Configuration file. Click "Download".

<u>SFSD</u>
This area is available to provide some basic welcome message to your users, such as, this is our organization's Wi-Fi network. Your device has been detected and by Connecting below you will be configured for our secure Wi-Fi Service.
The following system was detected:
Chrome extension installed successfully
Enter your credentials below then Download and Import the ONC Configuration file that will be provided
Download
By clicking the JoinNow button you accept the following <u>terms and</u> <u>conditions</u> .
Was your device detected incorrectly?

a. The status will show as "Generating Key..."
