System Notifications

OWL Buy generates notifications when action is required or when important updates occur.

- Common notification types include:
    - Approval requests
    - Returned transactions
    - Requisition updates
    - Supplier registration updates
    - Invoice status updates
    - Contract workflow updates
- Accessing Notifications:
    - Select the Notifications icon
    - Review the message details
    - Open the transaction if action is required

Users should review notifications regularly to ensure timely processing of procurement transactions.
